

Focused classrooms implementation checklist

Implementation checklists are a list of practical steps you can take to support the implementation of an evidence-based practice in your setting.

Have I ...

- Established and explicitly taught positive rules for learning?
- Developed routines that signal to students when learning is ready to begin and how learning will happen?
- Organised my classroom to promote on task behaviour so that learning routines can be embedded consistently?
- Explicitly taught the verbal and non-verbal cues about the rules and routines for learning to my students so that they can regulate themselves?
- Set learning goals for my students that are both ambitious but achievable? (Consult your [formative assessment](#) data and mastery learning objectives to help with this)
- Explored various options for participation that enable all students to participate in class activities? (for example, different types of grouping).
