

Spacing and retrieval practice implementation checklist

Implementation checklists are a list of practical steps you can take to support the implementation of an evidence-based practice in your setting.

Have I ...

- Looked at my curriculum documents to see what information my students will need to remember in the future?
- Written clear learning objectives to establish what students will need to know and produce by the end of the unit?
- Looked at my lesson sequences to see how the knowledge builds from one lesson to another?
- Planned deliberate opportunities throughout my unit for students to show me that they remember this information?
- Developed lesson activities that allow students to show their knowledge in different ways?
- Given students multiple opportunities to recall information before I assess them on it?
